

BlueBRIDGE - Incident #10005

Workspace shared folder copied into VRE shared folder has restricted access

Oct 23, 2017 10:35 AM - Costantino Perciante

Status:	Closed	Start date:	Oct 23, 2017
Priority:	High	Due date:	
Assignee:	Lucio Lelii	% Done:	100%
Category:	Default	Estimated time:	0.00 hour
Infrastructure:	Production		
Description			
If a shared folder is copied into a VRE shared folder, the list of users allowed to access doesn't change. The only ones allowed to access are the same of the original folder.

History

#1 - Oct 23, 2017 10:41 AM - Costantino Perciante

- Related to VRE #7450: request for a VRE for IOTC working party (octobre / november 2017) : IOTC SS3 VRE added

#2 - Oct 27, 2017 10:11 AM - Costantino Perciante

- % Done changed from 0 to 100

- Assignee changed from Costantino Perciante to Lucio Lelii

@lucio.lelii@isti.cnr.it can we release the fix for this?

#3 - Oct 29, 2017 01:26 PM - Pasquale Pagano

I think that this is not an incident but the expected behavior.

If I have a folder 1 shared with users A, B, and C and I have a folder 2 shared with B, C, D, and E and then I copy folder 1 into folder 2 what should be the users having access to folder 1?

- folder 2 (B, C, D, E)

-- folder 1 (A, B, C)

If we put the same users of folder 2 then

- either A will lose his privilege to access the folder.

- or we make the union of users but this is worst if folder 2 is a VRE folder since User A is not a member of the VRE.

#4 - Oct 30, 2017 09:29 AM - Costantino Perciante

- Status changed from In Progress to Closed

You can also interpret the action as "no matter with which it was shared, just share its copy with all other vre members". This is how we did it.

I'm going to check if I can recover the folders in the linked ticket somehow.

In the meantime I am going to close this ticket
