@roberto.cirillo@isti.cnr.it In order to exploit this component, it needs to be deployed along with a geonetwork instance.

@pasquale.vitale@eng.it can you report deployment details here (

https://gcube.wiki.gcube-system.org/gcube/GeoNetwork_Configuration#SmartGears_Installation) so that ansible rules can be adjusted accordingly?

I've reported deployment details at this link https://gcube.wiki.gcube-system.org/gcube/GeoNetwork_Configuration#SmartGears_Installati in the "GeoNetwork Connector installation" section.
