Sprint:	WP08		
Infrastructure:	Production		

Description

Related to the ticket #10759 , we would like an empty database (PostgreSQL + PostGIS) for the new VRE French tropical tuna atlas.

The specifications for the database to deploy are below:

- The database should be named "tunaatlas_france".
- PostGIS extension with postgis_topology should be enabled
- The PostgreSQL + PostGIS versions should be the ones used in the current tunaatlas database
- The capacity should be 100 GB
- The database should be empty (i.e. we will deploy the model once the empty database is available)
- There should be one role named "tunaatlas_admin" with CREATEROLE and CREATEUSER privileges

Thanks,

Paul

@paul.taconet@ird.fr I need to know the additional user names to set up the postgresql ACLs correctly. Do you also need access from the phpPgAdmin instance? If so I'll need to add a CNAME to that server, phpPgAdmin is very old and unmaintained and I need to do some tricks to let a user connect to different databases.

#3 - Jan 25, 2018 04:47 PM - Paul Taconet

To start I would need two users (both with USAGE privileges):

- *tunaatlas_inv* (access to a set of tables only)
- *tunaatlas_conf* (access to all the tables, i.e. both public and confidential data)

Thank you

#4 - Jan 25, 2018 04:48 PM - Paul Taconet

Regarding phpPgAdmin, it is not necessary for now. Thanks

#9 - Jan 26, 2018 04:33 PM - Andrea Dell'Amico

Hm. There was an error in the pg_hba.conf file, so the reload was failing. It should be OK now.

#10 - Jan 26, 2018 04:39 PM - Paul Taconet

ok, sorry I did not save the pw. Can you give it to me again?

#12 - Jan 26, 2018 04:48 PM - Paul Taconet

Thanks
I have saved the pw and tried to connect: it's working!
I will do some tests for the users next week.
Thanks a lot,
Paul
