

## ISTI Open Access - Feature #12069

### Envisage the possibility to select many faceted search in one shot

Jun 29, 2018 10:23 AM - Leonardo Candela

<b>Status:</b>	Closed	<b>Start date:</b>	Jun 29, 2018
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Michele Artini	<b>% Done:</b>	100%
<b>Category:</b>			
<b>Target version:</b>	ISTI Open Portal Tasks		
<b>Description</b>			
Once a result set is displayed and the faceted queries are reported, we should consider supporting users executing many faceted queries in one step (this might lead to an empty set).			
Examples of expected "queries" are			
<ul style="list-style-type: none"><li>• give me the result set items of authors A and B (where A and B where possible values of facet queries);</li><li>• give me the result set items of authors A in Year B and C;</li></ul>			

### History

Done.

Is it possible to perform faceted queries specifying a different operator for each field (AND / OR).
