I configured D-Net to aggregate the set CDS111 from the CNR repository.

But the collection failed for a server side error harvesting the 5th page (it should be the last) on the CNR repository,

I tried also to harvest that set using a script but the unique information, that I obtained, is a generic **500 Internal Server Error**.

@leonardo.candela@isti.cnr.it could you inform the OAI administrator?
