

## ISTI Open Access - Task #25584

Task # 25582 (New): Migrate OpenPortal stack on the openstack infrastructure

### Migrate OpenPortal front end to the openstack infrastructure

Sep 06, 2023 11:13 AM - Leonardo Candela

<b>Status:</b>	New	<b>Start date:</b>	Sep 06, 2023
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Michele Artini	<b>% Done:</b>	0%
<b>Target version:</b>	To Be Planned		
<b>Description</b>			
This activity should be performed as follows:			
<ul style="list-style-type: none"><li>• we have to create a clone of the current Joomla instance in the new infrastructure;</li><li>• we will use the Joomla migration procedure to move to Joomla 4;</li></ul>			
The resulting front end instance will be a development instance and will interact with the current back-end on the "old infrastructure" (namely Mongo and Solr instances). As a consequence, we should enable the new instance to interact with the existing instances of Mongo and Solr).
