soa3.connector.common-security should be removed from the release but the following active components depends on it:

- org.gcube.vre-management.ghnmanager-client (it should be removed) . Please @[roberto.cirillo@isti.cnr.it](mailto:roberto.cirillo@isti.cnr.it) and/or @[lucio.lelli@isti.cnr.it](mailto:lucio.lelli@isti.cnr.it) is it possible to remove or refactor this component?

- org.gcube.vre-management.softwaregateway-client (active): please @[roberto.cirillo@isti.cnr.it](mailto:roberto.cirillo@isti.cnr.it) is it possible to refactor this component?
- org.gcube.vre-management.resourcemanager-client (active): please @[roberto.cirillo@isti.cnr.it](mailto:roberto.cirillo@isti.cnr.it) is it possible remove this component ? (Andrea Manzi was the responsible)
- org.gcube.vre-management.softwaregateway-cli (active) : please @[roberto.cirillo@isti.cnr.it](mailto:roberto.cirillo@isti.cnr.it) is it possible to refactor this component?
- org.gcube.application-support-layer.application-support-layer-core (active): please @[laskarism@di.uoa.gr](mailto:laskarism@di.uoa.gr) is it possible to refactor application-support-layer-core?

Than you  
Maria.

In order to evaluate if is possible to remove the dependency above from softwaregateway-cli and softwaregateway-client components I've tried to run these component on etics building with platform 4.4.0 and 4.5.0 but unfortunately I've a failure on both component. However in the last nightly build these component were successfully built:

[http://etics.esl.eng.it/etics-repository-ws/reports/id/c981b2dd-4965-48f0-88d2-76948866633f/centos6.9\\_x86\\_64\\_gcc447/-/reports/build-status.xml](http://etics.esl.eng.it/etics-repository-ws/reports/id/c981b2dd-4965-48f0-88d2-76948866633f/centos6.9_x86_64_gcc447/-/reports/build-status.xml)

Have you any idea about these failure? Maybe have I missed something?

Dear [@roberto.cirillo@isti.cnr.it](mailto:roberto.cirillo@isti.cnr.it) , regarding softwaregateway-cli the build failed because is removed from gCore release , it's provided in Smartgear release.

You executed the build of this component in gCore as reported in the build log:

```
"  
etics-checkout --volatile org.gcube.4-5-0-gcore --ignorelocking --config org.gcube.vre-management.softwaregateway-cli.1-2-0-1 --project org.gcube  
--project-config org.gcube.4-5-0-gcore --forcecheckout --verbose --continueonerror org.gcube.vre-management.softwaregateway-cli  
"
```

Those components should be removed from the Smartgear release.

Regarding the softwaregateway-cli seems that the version of the common-fw-client is not provided in the range of the softwaregateway-cli maven configuration ([http://svn.research-infrastructures.eu/public/d4science/gcube/branches/vre-management/softwaregateway\\_client/2.0/pom.xml](http://svn.research-infrastructures.eu/public/d4science/gcube/branches/vre-management/softwaregateway_client/2.0/pom.xml)): the solution should be provided in the ETICS dependencies configuration the common-fw-client (this is possible solution).  
In any case , I executed (again) a local build for each components.

I hope to have helped you.

Please, you don't hesitate to contact me for everything.

Thank you ,  
Maria.

I'm sorry but I don't understand your comment. There are two components: softwaregateway-cli and softwaregateway-client. What component are you referring?

I apologize , the component to check is software-gateway-client.

Regarding the softwaregateway-client seems that the version of the common-fw-client is not provided in the range >>of the softwaregateway-client maven configuration ([http://svn.research-infrastructures.eu/public/d4science/gcube/branches/vre-management/softwaregateway\\_client/2.0/pom.xml](http://svn.research-infrastructures.eu/public/d4science/gcube/branches/vre-management/softwaregateway_client/2.0/pom.xml)); the solution should be provided in the ETICS >>dependencies configuration the common-fw-client (this is possible solution).

The local build is ok . So, I think that no action should be done.

Build for software-gateway-client is available here:

Thanks Maria but you have run the following old configurations:

org....waregateway-client.2-0-0-1

org....oftwaregateway-cli.1-2-0-1

as reported by your reports.

I've just created and run the new configurations (without the dependency soa3.connector.common-security) successfully.

The new configurations are the following:

org.gcube.vre-management.softwaregateway-client.2-0-0-2

org.gcube.vre-management.softwaregateway-cli.1-2-0-2

I'm going to attach the new configuration to the subsystem.

I'm going to assign this ticket to [@laskarisn@di.uoa.gr](mailto:laskarisn@di.uoa.gr)

**#14 - May 15, 2017 12:52 PM - Maria Di Girolamo**

Please, [@laskarisn@di.uoa.gr](mailto:laskarisn@di.uoa.gr) could you check if

org.gcube.application-support-layer.application-support-layer-core (active) can be re-factored removing org.gcube.vo-management.soa3.connector.common-security (it should be removed from the release 4.5.0).

Thank you,  
Maria.

**#15 - May 15, 2017 03:00 PM - Nikolas Laskaris**

Sure, just give me a moment to check!

**#16 - May 15, 2017 04:18 PM - Nikolas Laskaris**

Removed it! Released asl-core 5.1.1 which will not have this dependency anymore!
