## History

### #1 - May 24, 2017 07:14 PM - Nikolas Laskaris

- Status changed from Available to Under Integration

### #2 - May 29, 2017 09:10 AM - Maria Di Girolamo

- Status changed from Under Integration to Build Issue

The last nightly build failed:

Because is missin in maven repository the dependency geoanalytics-functions-common.

I checked geonalytics-functions-common and the pom is not correct missing depdenency, source packages. Distro directory is missing too (it's mandatory for the distribution packages as reported in the wiki packages : [https://wiki.gcube-system.org/gcube/Maven\\_distro\\_directory\\_layout](https://wiki.gcube-system.org/gcube/Maven_distro_directory_layout).

Please, could you clarify because the pom of geoanalytics-functions-common. is incomplete (if this it's true) and the missing of the distro directory?

Thank you, Maria.

I've added exactly what you said is missing (which i presume don't affect the build), but etics still has difficulties to find the object which was previously built.
